Influence of Quantum Resonance Technology “IMMUNITY” on Human Pilot Study

Aim

The aim of the study is to study the influence of the Quantum Resonance Technology app on human to see possible beneficial benefits.

Subjects

5 (3 men; 2 women) apparently healthy test subjects aged between 22 - 60 years.

Methods

The subjects were presented with comparable requirements and were received in a quiet environment into the premises of GDV International in Switzerland. The initial full-scan tests were to assess the testability and homeostasis regulation of the individual subjects. A diagnostic device, Gas Discharge Visualization (GDV) Bio-Well with plasma discharge technology was used. The measured data was evaluated by a corresponding analysis software.

Test procedure

The subjects were first tested in neutral state. The second test was after listening to the Immunity music. It was based on the principle of “before and after” testing of the subjects.

In the final evaluation, the results obtained from each subject is analyzed using additional statistical software.

The finger scans are designed to record the energy and wellness of a person. It is not a medical device.

Investigation results

Energy Levels, Balance, Organ Systems (Respiratory, Immune & Thorax)

Different reactions of the subjects regarding Energy in Joules:

Red - Subjects in Neutral state

Blue - Subjects after listening to IMMUNITY

Different reactions of the subjects regarding Balance:

Orange - Subjects in **neutral state**

Blue – Subjects after listening to IMMUNITY

The finger scans are designed to record the energy and wellness of a person. It is not a medical device.

Different reactions of the subjects regarding Respiratory System:

Orange - Subjects in **neutral state**

Blue – Subjects after listening to IMMUNITY

Different reactions of the subjects regarding Immune System:

Red - Subjects in Neutral state

Blue - Subjects after listening to IMMUNITY

Different reactions of the subjects regarding Thorax Zone:

Orange - Subjects in **neutral state**

Blue – Subjects after listening to IMMUNITY

Environment tests with the Sputnik Antenna:

There were increased levels in **Area, Intensity, Energy and Area deviation** when exposed to the IMMUNITY app.

Conclusion:

The Immunity app:

1. Shows a state of harmonized balance
2. Energetically influences the Respiratory System and the Thorax Zone
3. Influenced increased levels of energy in most subjects

Responsible for this small pilot study:
